CARIZZMA™ Colors

Helping make

IMAGINATION reality.

Carizzma™ colors are the ultimate tool for any painter's "box of tricks." They afford you the versatility of Diamont™ finishes with the look and excitement of custom colors. Eight ready-for-use *Carizzma*™ dyes are now available. They're cleaner and stronger than most competitive dyes and can be intermixed to provide nearly infinite color possibilities.

Clear base (BC00) can be used to reduce dye strength to a desired level. *Carizzma* colors work well in standard refinish spray equipment or in smaller detail custom airbrushes. They can be sprayed over the top of basecoats for a "candy effect" or mixed with Diamont bases to achieve exciting, new and vibrant colors. Their quick-drying between coats, shortens tape times and eliminates problems with inter-coat adhesion.

The portfolio of *Carizzma* colors can help you to expand your creative boundaries and produce people-stopping, head-turning paint jobs unlike anything else. To maximize the versatility and comprehensiveness of your R-M paint system, add *Carizzma* colors and watch your imagination come to life.
